Osama Abdulaziz|Information Technology

Email: osamafcv214@gmail.com , Phone: +966537820694, Location: Saudi Arabia, Madinah,

Nationality: Saudi, Linked in: https://www.linkedin.com/in/osama-al-harbi

Objective:

An ambitious IT graduate seeking to utilize their skills in technical support and TCP/IP network administration to ensure infrastructure efficiency and service continuity. I possess strong knowledge of SQL databases and systems development, enhanced by professional cybersecurity certifications from ISC2 and IBM. My goal is to contribute to digital and operational excellence through data analysis and technical documentation skills in a professional work environment.

Education:

Bachelor's degree in information technology, Islamic University of Madinah, Graduated: Jan 2026

Experiences:

Total Quality Management (TQM) CO-OP Trainee at Deanship of Information Technology and E-Learning in Islamic University Madinah

June 2025 - August 2025

- Provided technical and operational support within a university IT environment by monitoring and evaluating digital services and IT systems.
- Reviewed IT operational procedures and system documentation to ensure compliance with technical and quality standards.
- Assisted in identifying system issues, service gaps, and improvement opportunities to enhance service reliability and system availability.
- Supported performance measurement activities by collecting data and calculating KPIs related to service uptime, continuity, and user satisfaction.
- Utilized documentation and diagramming tools such as Microsoft Visio to analyse workflows and support IT operations.

Digital Transformation Trainee at Deanship of Information Technology and E-Learning in Islamic University Madinah

January 2026 – Present

- Analyzed and reviewed Digital Transformation Measurement reports issued by the Digital Government Authority (DGA) to identify operational and technical gaps and enhance overall performance indicators.
- Developed and audited technical evidence and documentation required for compliance with national Digital Maturity standards, ensuring full alignment with the latest government manuals and policies.
- Overseeing the issuance of periodic reports to monitor adherence to data governance and management policies, ensuring sustainable institutional oversight and compliance effectiveness.
- Governed the digital experience by registering digital services and platforms within the "Raqmi" portal, ensuring alignment with national "Digital Fabric" requirements.
- Established and updated software asset inventories and technical system reports, including technical data, programming languages, and licensing details.
- Supported performance measurement activities by tracking and analyzing e-service transaction data and calculating KPIs related to utilization levels and financial impact.
- Coordinated with technical teams (such as Systems Analysis) to review Business Requirement Documents (BRDs) and update procedural references to ensure the completeness of technical evidence for assessment cycles.

Volunteer Experiences:

Technical Volunteer | Deanship of IT - Islamic University (National Volunteer Portal) August 2025

- Completed 96 certified volunteer hours focused on implementing cooperative training for technical programs and systems.
- Supported the National Center for Non-Profit Sector’s initiatives by providing technical assistance and training during the cooperative program.
- Enhanced the efficiency of technical software utilization by applying academic knowledge to real-world non-profit sector projects.

Projects:

Graduation Projects:

Student Complaints Management System (Voice of Student)

- Developed an automated workflow system (Voice of Student) to transition manual administrative procedures into a digital platform, improving response time.
- Designed and optimized secure database schemas using SQL/MySQL to ensure data integrity and efficient retrieval of sensitive records.
- Streamlined system workflows and enhanced user experience (UX) by designing an intuitive interface using HTML, CSS, and JavaScript, which reduced the time required for complaint submission.
- Implemented a multi-tier authorization framework (User, Faculty, Admin) to ensure data confidentiality and seamless inter-departmental communication.
- Executed rigorous system testing and debugging phases, ensuring high reliability and stability in the complaint tracking and status update modules.

Professional Development:

Professional Certifications:

- Network and Communications Security, ISC2 | Credential ID: HPUZITAO56UA (January 2025)

  Knowledge of network security fundamentals and endpoint protection relevant to IT support environments.
- Principles of Security, ISC2 | Credential ID: RHKTIRIVXJFL (January 2025)

  Understanding of access control, authentication, and secure system operations to support safe IT service delivery.
- Introduction to Cybersecurity Tools and Cyber Attacks, IBM | Credential ID: DZ93HR2XW4I1 (January 2025)

  Awareness of common cyber threats, security tools, and incident reporting procedures.

Workshops:

- **Overcoming Challenges and Seizing Opportunities in Software Engineering**
- Islamic University of Madinah, Deanship of Graduate Studies (April 2024)
- Intensive course (5 hours) as part of the 5th Scholars Week activities.

Skills:

Hard skills:

- Data Analysis
- Network Protocols (TCP/IP), Routing, and Connectivity Assurance.
- Operating Systems (Windows & Linux)
- Microsoft Office
- Development & Databases: SQL, MySQL (Design & Management), HTML5, CSS3.
- Technical Documentation

Soft skills:

- Problem-Solving and Critical Thinking
- Attention to Detail
- Collaboration and Teamwork
- Time Management and Organization
- Proactivity and Initiative
- Training and Simplification

Languages:

. Arabic Native

. English STEP Score: 60
